

Pedini **Al centro** In the center
of the kitchen's world.
PEDINI
del mondo cucina
Au centre du monde de la cuisine. En el centro del mundo de la cocina.
Im Mittelpunkt der Welt der Küche.

_In their constant pursuit of creating new and cutting edge kitchen designs, Pedini has always interpreted the tastes and trends of the market, into top quality products. The balance between technology and ecology, to which Pedini always pay attention, become synonyms of aesthetics, high functionality and respect for the environment.

“ At Pedini, we are convinced that the relationship between people and their surrounding environment characterize their quality of life, thus making meal preparation a more pleasant experience.

In five words - “the pleasure of the kitchen”. ”

_The idea of the “round kitchen” was born out of this philosophy: the kitchen must be an ergonomically designed, functional place - the “inner” part of the circle, functions as the centre of the meal preparation and the “outer” part, as the living/eating space.

Dune. Source of innovative ideas.

A perfect union between contemporary style, innovation and an ergonomic solution. A design that crosses over from fashions to function.

That breaks the mould of the usual or the “already seen”. The completeness of the program, the attention to the details - style and functionality - most suitable for one’s own lifestyle.

Dune patented model _ Design: Domenico Paolucci

With Dune, we started from the basic concepts of modular kitchens, which is Pedini’s roots, to create a cooking instrument, that is flexible (small or large), fully equipped, designed with curved or straight shapes, “L” or island shaped. All without corners, with graceful forms that create concave and convex shapes. To allow for perfect ergonomics, to introduce a new balance and to create more functional spaces in the kitchen.

The doors: smooth door.

The colours: veneered walnut doors, matt lacquered doors, glossy lacquered doors.

The handles: integrated handle and groove.

The worktops: stainless steel worktops, decorated glass worktops, quartz worktops, Corian worktops.

The storage: various storage solutions have been created for mass storage of both large and small items. The tall unit with sliding doors mechanism is an efficient device to save space, which is now enriched of the new tall unit with re-entering doors which allow a total access to the storage area.

Integra. Total look in the kitchen.

A project that integrates in itself a wide range of furnishing elements and essential geometries which express themselves through the power of the materials: a mixture of substance, essence and technique of absolute visual impact.

Integra patented model _ Design: Domenico Paolucci

Like its name Integra brings different elements together. One complete design theme, in three variants - Each of the three Integra options has their own unique characteristics, separating them and marking them out as a range in their own right. A holistic design ethos means they can be harmoniously merged and integrated to create wonderfully bespoke compositions. Woods such as natural, and silver grey oak and a vast range of lacquered colours create choice. The main features are wide, fixed and movable worktops, Islands, Peninsulas and curved unit configurations. Tall units have the double function of providing organised storage and space partitioning where required.

The doors: veneered door with frame and smooth door.

The colours: oak doors available in 6 colours, glass doors, matt lacquered doors, glossy lacquered doors.

The handles: with groove (channel between the base units and the worktop which replaces the handles and allows the opening of the doors) and satin or burnished aluminium handle.

The worktops: stainless steel worktops, glass worktops, stainless steel worktops with wooden trim, Unicolor laminated worktops, Cristalan solid surface worktops.

The storage: functional and modern equipments to allow ergonomic movements and the best usage of the interior without wasting one single centimetre of space.

Q2System. Choice without hesitations.

The distinctive feature is the innovative design, where creativity and technology meet, experience and innovation are boasted, and the equilibrium of shapes merges with the pureness of materials.

Design: Domenico Paolucci

Minimalism to the max! Elegant, practical, and with a "clean look" to the highest level. Q2System renews and develops the room we call kitchen. It could not be otherwise called a "kitchen system" if it wasn't so resourceful and innovative. This new version renews itself in thousands of colours of laminate, in the endless number of lacquer tones, in the brightness of glass and in the warmth of wood. A "living" space characterized by qualitative performance of reliability and functionality, with a high "rate of flexibility" supported by superb materials and by innumerable personal choice elements. A system that uses the language of rationality, harmonizing it with a careful selection of materials: the glass, the decorated glass, the lacquered, the laminated, the aluminium and the steel - they are all different materials that in this project appear uniform to underline the different functions.

The doors: smooth door.

The colours: stratified wood Alpikord door, glossy laminated door, matt laminated door, lacquered glass door, decorated lacquered glass door, mat lacquered door, glossy lacquered door.

The handles: bridge-shaped aluminium handle, Integra handle, L shaped handle in satin finish aluminium, groove in satin finish aluminium, pressure opening with "Servodrive" mechanism for drawers and baskets.

The worktops: stainless steel worktops, glass worktops, quartzite worktops, Cristalan solid surface worktops, Unicolor laminated worktops in different colours.

The storage: has functional and modern equipments to allow ergonomic movements and the best usage of the interior without wasting one single centimetre of space.

Magika. Puts back the Fun in Function.

The newest model from Pedini - an economical model that has the same rich modularity and quality as all Pedini products. Combining a young look, fresh design features and tradition of quality - Magika is a perfect solution for the budget minded client and the multi unit builder or developer. Great flexibility, top quality and speedy delivery are the three main features of this kitchen.

Design: Domenico Paolucci

Essential and clear. This is the language of Pedini with Magika. Light, dynamic and brilliant kitchen, capable to meet innovative function with traditional usages, drawing near shapes and rational solutions. It characterizes itself by the thermostructured finishing, a working process that gives preciousness to the door granting it a natural sensation.

The door: smooth.

The colours: thermostructured in different finishing, glossy lacquered, direct applied lacquered, painted glass.

The handles: aluminium handle available in two finishing, or with groove (aluminium, varnished aluminium white, black, anthracite).

The worktops: quartzite worktops in different colours, laminated with unicolor edges available in grey, graphite, white, stainless steel worktops satin finish available in different thickness.

The storage: has functional and modern equipments to allow ergonomic movements and the best usage of the interior without wasting one single centimetre of space.

Artika. A modern “operative centre”.

A modern “operative centre” where you can taste the warmth, technology, functionality in the kitchen, characterized by a high flexibility, great design freedom and personalized solutions for different needs for space and taste.

Design: Domenico Paolucci

With its big rounded island, open and free in the movements, Artika goes beyond the traditional concept of horizontality to re-draw the kitchen completely, tuned with new needs and spaces. Mixed or traditional, in the middle of the room or against the wall, Artika furnishes in complete freedom, makes people live the environment according to their attitudes, resolves any problem of space.

The doors: horizontally the door is rounded.

The colours: mat lacquered doors, glossy lacquered doors.

The handles: with groove (channeling between the base units and the worktop which replaces the handles and allows the opening of the doors) and recessed handle.

The worktops: stainless steel worktops, varnished glass worktops, quartzite worktops, cristalan solid surface worktops, unicolor laminated worktops in different colours.

The storage: the modern and functional equipments allow a smart storage.
